3 sessions

Dull skin

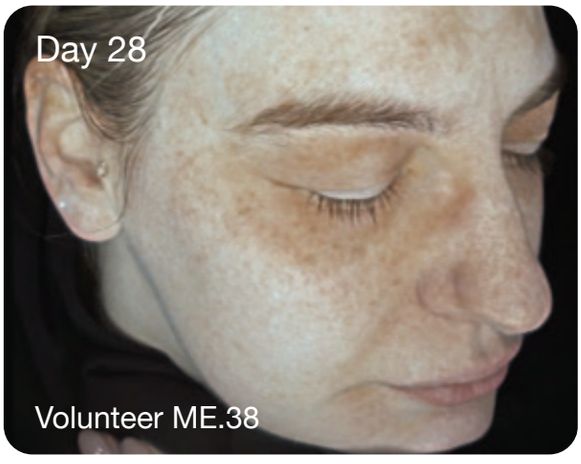

3 sessions

Uneven skin tone

3 sessions

Results based on a clinical study with 20+ patients, conducted across 8 countries from May to July 2026, involving 10+ practitioners.

THE GLOW SYSTEM™ IN AESTHETIC CLINICS:

Designed for flexible integration into aesthetic practice, The Glow System™ may be used alone or as part of a broader skin-quality program. Its resurfacing and radiance-enhancing action makes it particularly relevant before, between or after selected aesthetic interventions, including microneedling, laser, LED and other light-based procedures.

Clinical Study Conclusions:
The Glow System™ protocol addresses a broad range of skin concerns, including dull and uneven-looking skin, post-acne marks, visible pores, rough texture and early visible signs of aging, while promoting a brighter, smoother and more refined complexion.

> 90%
of practitioners confirmed improvement of the overall condition of the skin
