

# REVOLAX™

Firm & Lasting Hyaluronic Acid Dermal Filler

## REVOLAX **FINE** with Lidocaine

REVOLAX Fine is the most lightweight dermal filler within the REVOLAX range. Treatment areas include superficial lines, crow's feet, glabellar lines and neck wrinkles.

## REVOLAX **DEEP** with Lidocaine

REVOLAX Deep is a thicker and longer-lasting gel used for nasolabial folds and augmentation of the cheeks, chin and lips.

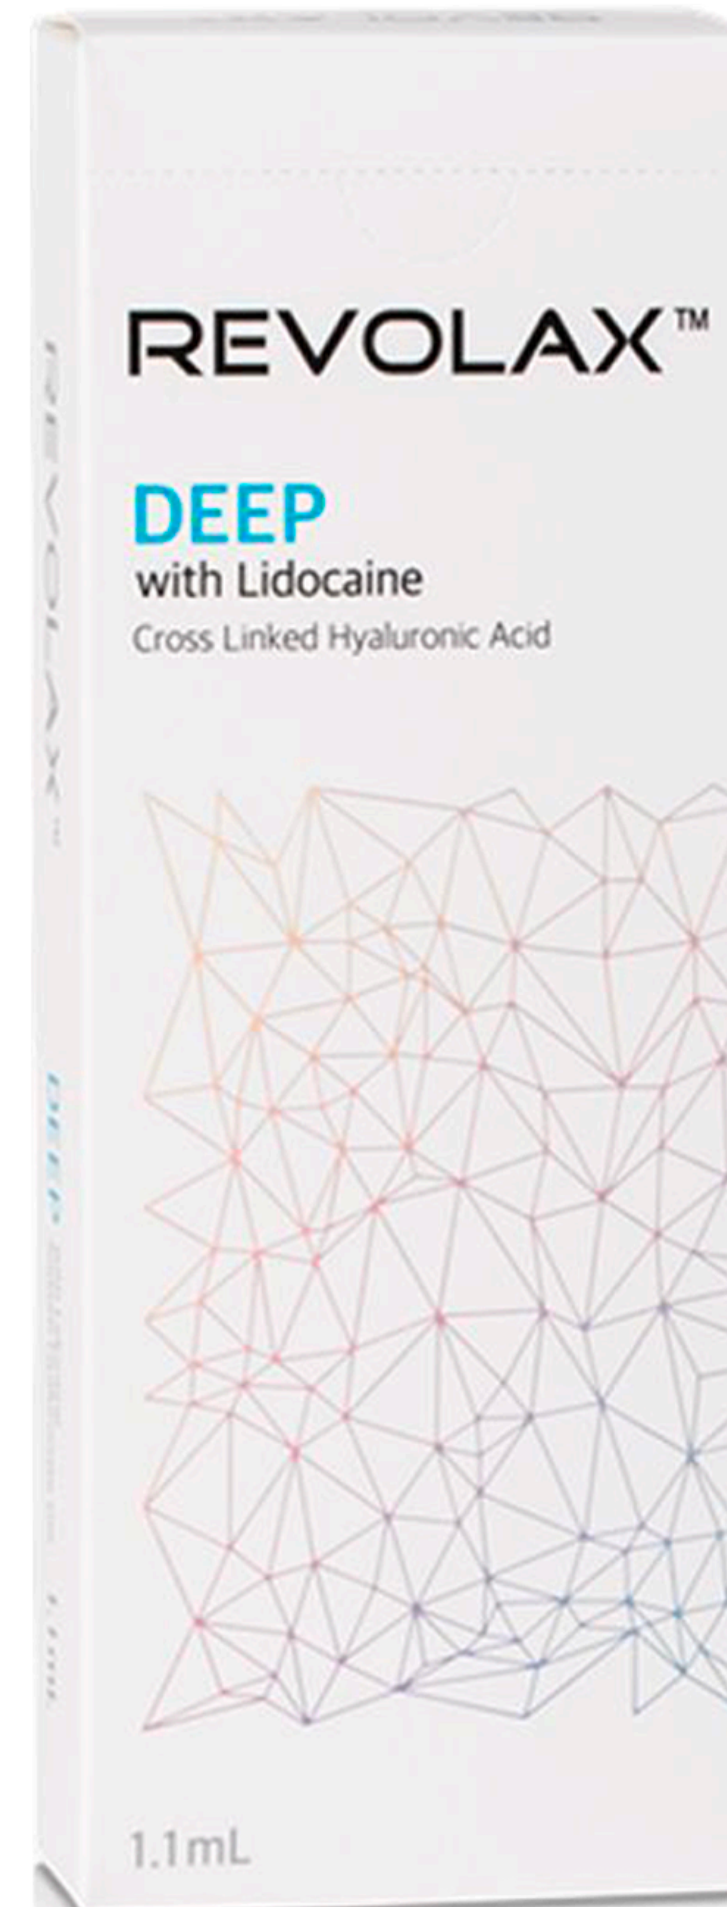

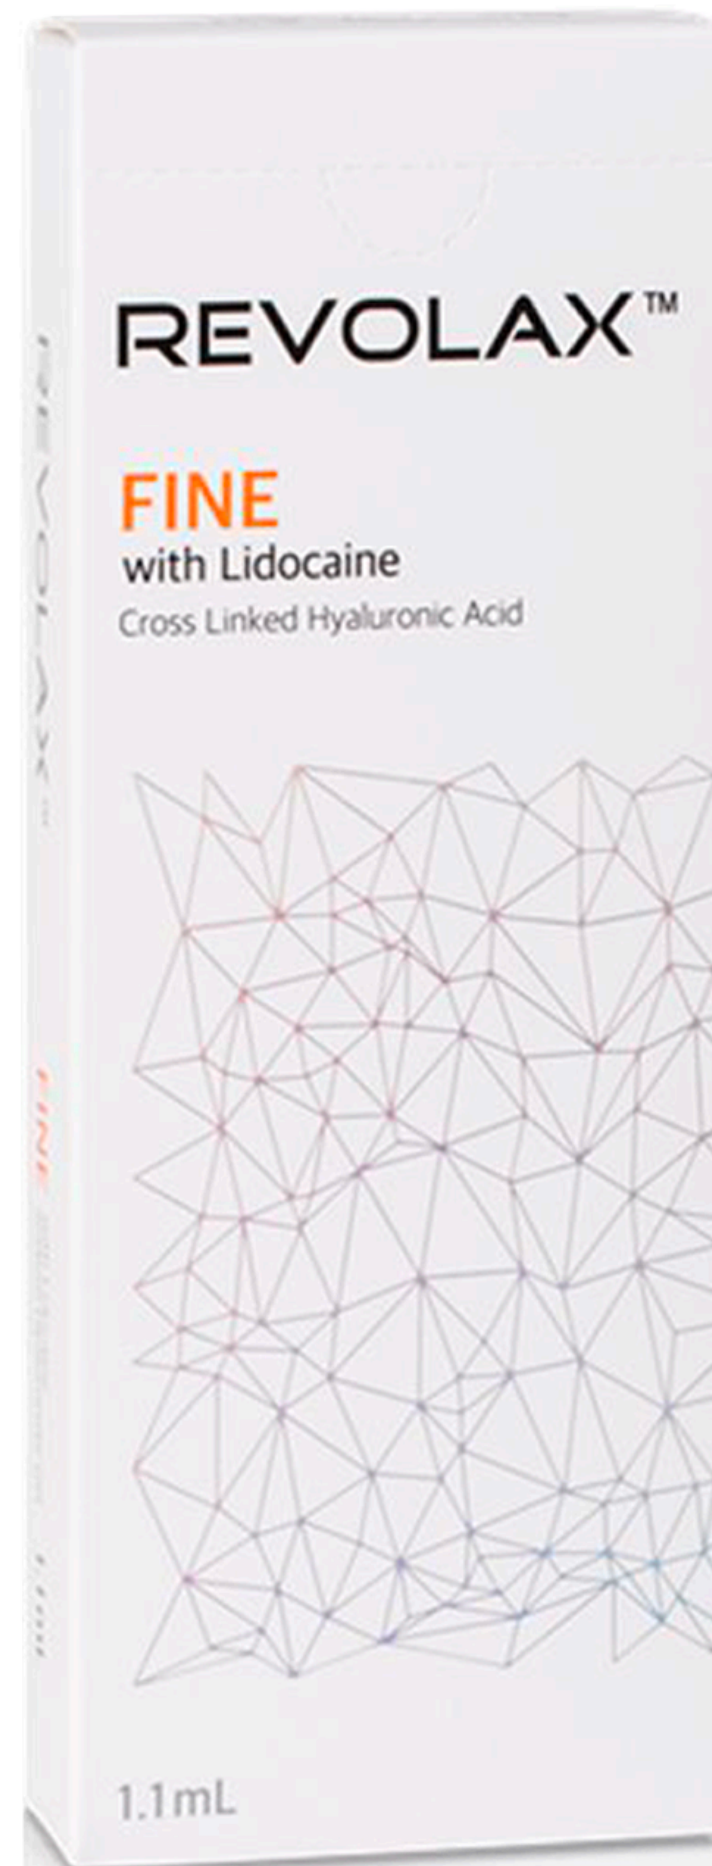

## REVOLAX **SUB-Q** with Lidocaine

REVOLAX Sub-Q is the thickest gel within the dermal filler range. Best suited for the cheek, chin, nose and jawline, REVOLAX Sub-Q structures and moulds for deep to extremely severe wrinkles.

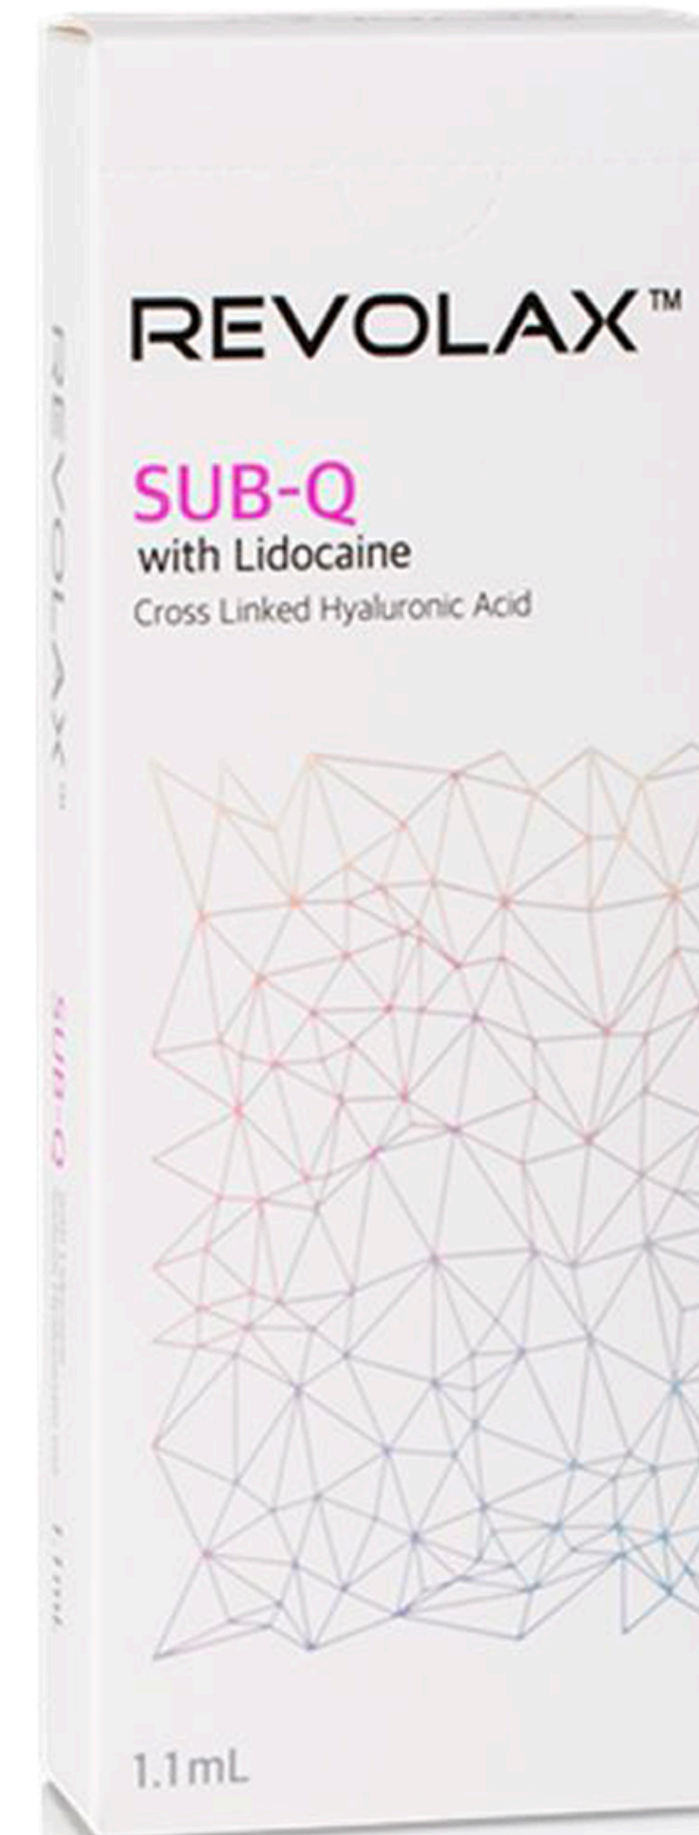

**FINE**  
**Superficial to top dermis**

Forehead lines  
Crow's feet  
Glabella lines  
Neck wrinkle  
Lower eyelid contouring

**DEEP**  
**Mid to deep dermis / Subcutaneous layer**

Nasolabial folds, Laugh lines, forehead, Nose, chick, chin augmentation.

**SUB-Q**  
**Deep subcutaneous Layer**

Forehead lines  
Crow's feet  
Glabella lines  
Neck wrinkle  
Lower eyelid contouring

## WHAT IS REVOLAX™

REVOLAX has fast become an industry-leading dermal filler due to its high-quality standards and pioneering crosslinking technology.

REVOLAX is a non-animal crosslinked soft tissue filler made of the highest quality Hyaluronic Acid.

REVOLAX works by adding volume to facial tissue, thus improving wrinkles, folds and restoring a smooth appearance to the face with plump, rejuvenated volume.

REVOLAX uses non-animal based hyaluronic acid of the highest purity and is a completely natural substance optimised to synchronise with human skin tissue to give a natural-looking end result.

With a regular and dense monophasic structure which makes the gel product stable and consistent, the consistency of the pattern allows for naturally harmonised volume, smooth injection and promotes a stronger support system within the skin structure.

REVOLAX™

## MATERIAL PROPERTIES

REVOLAX has a monophasic structure of regular and dense lattice which allows consistent smooth injection throughout the treatment and helps to naturally harmonise volume, look and feel.

REVOLAX's highly structured dense and regular patterns, unlike most other HA monophasic fillers, make the structure more solid and durable whilst maintaining viscosity and elasticity.

The product has been designed to appear natural looking over the full course of time up until the point that it is fully absorbed into the skin.

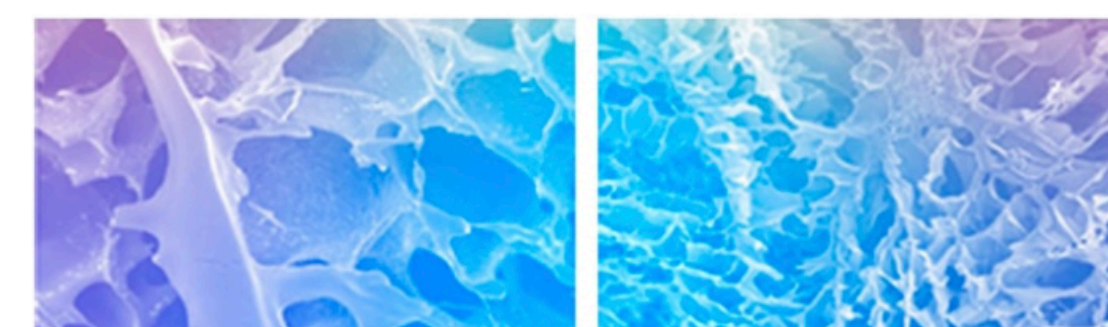

**REGULAR PATTERN, DENSE STRUCTURE**

**COMPETITOR FILLER A**

**COMPETITOR FILLER B**

**REVOLAX™**

## HIGH VISCO-ELASTICITY

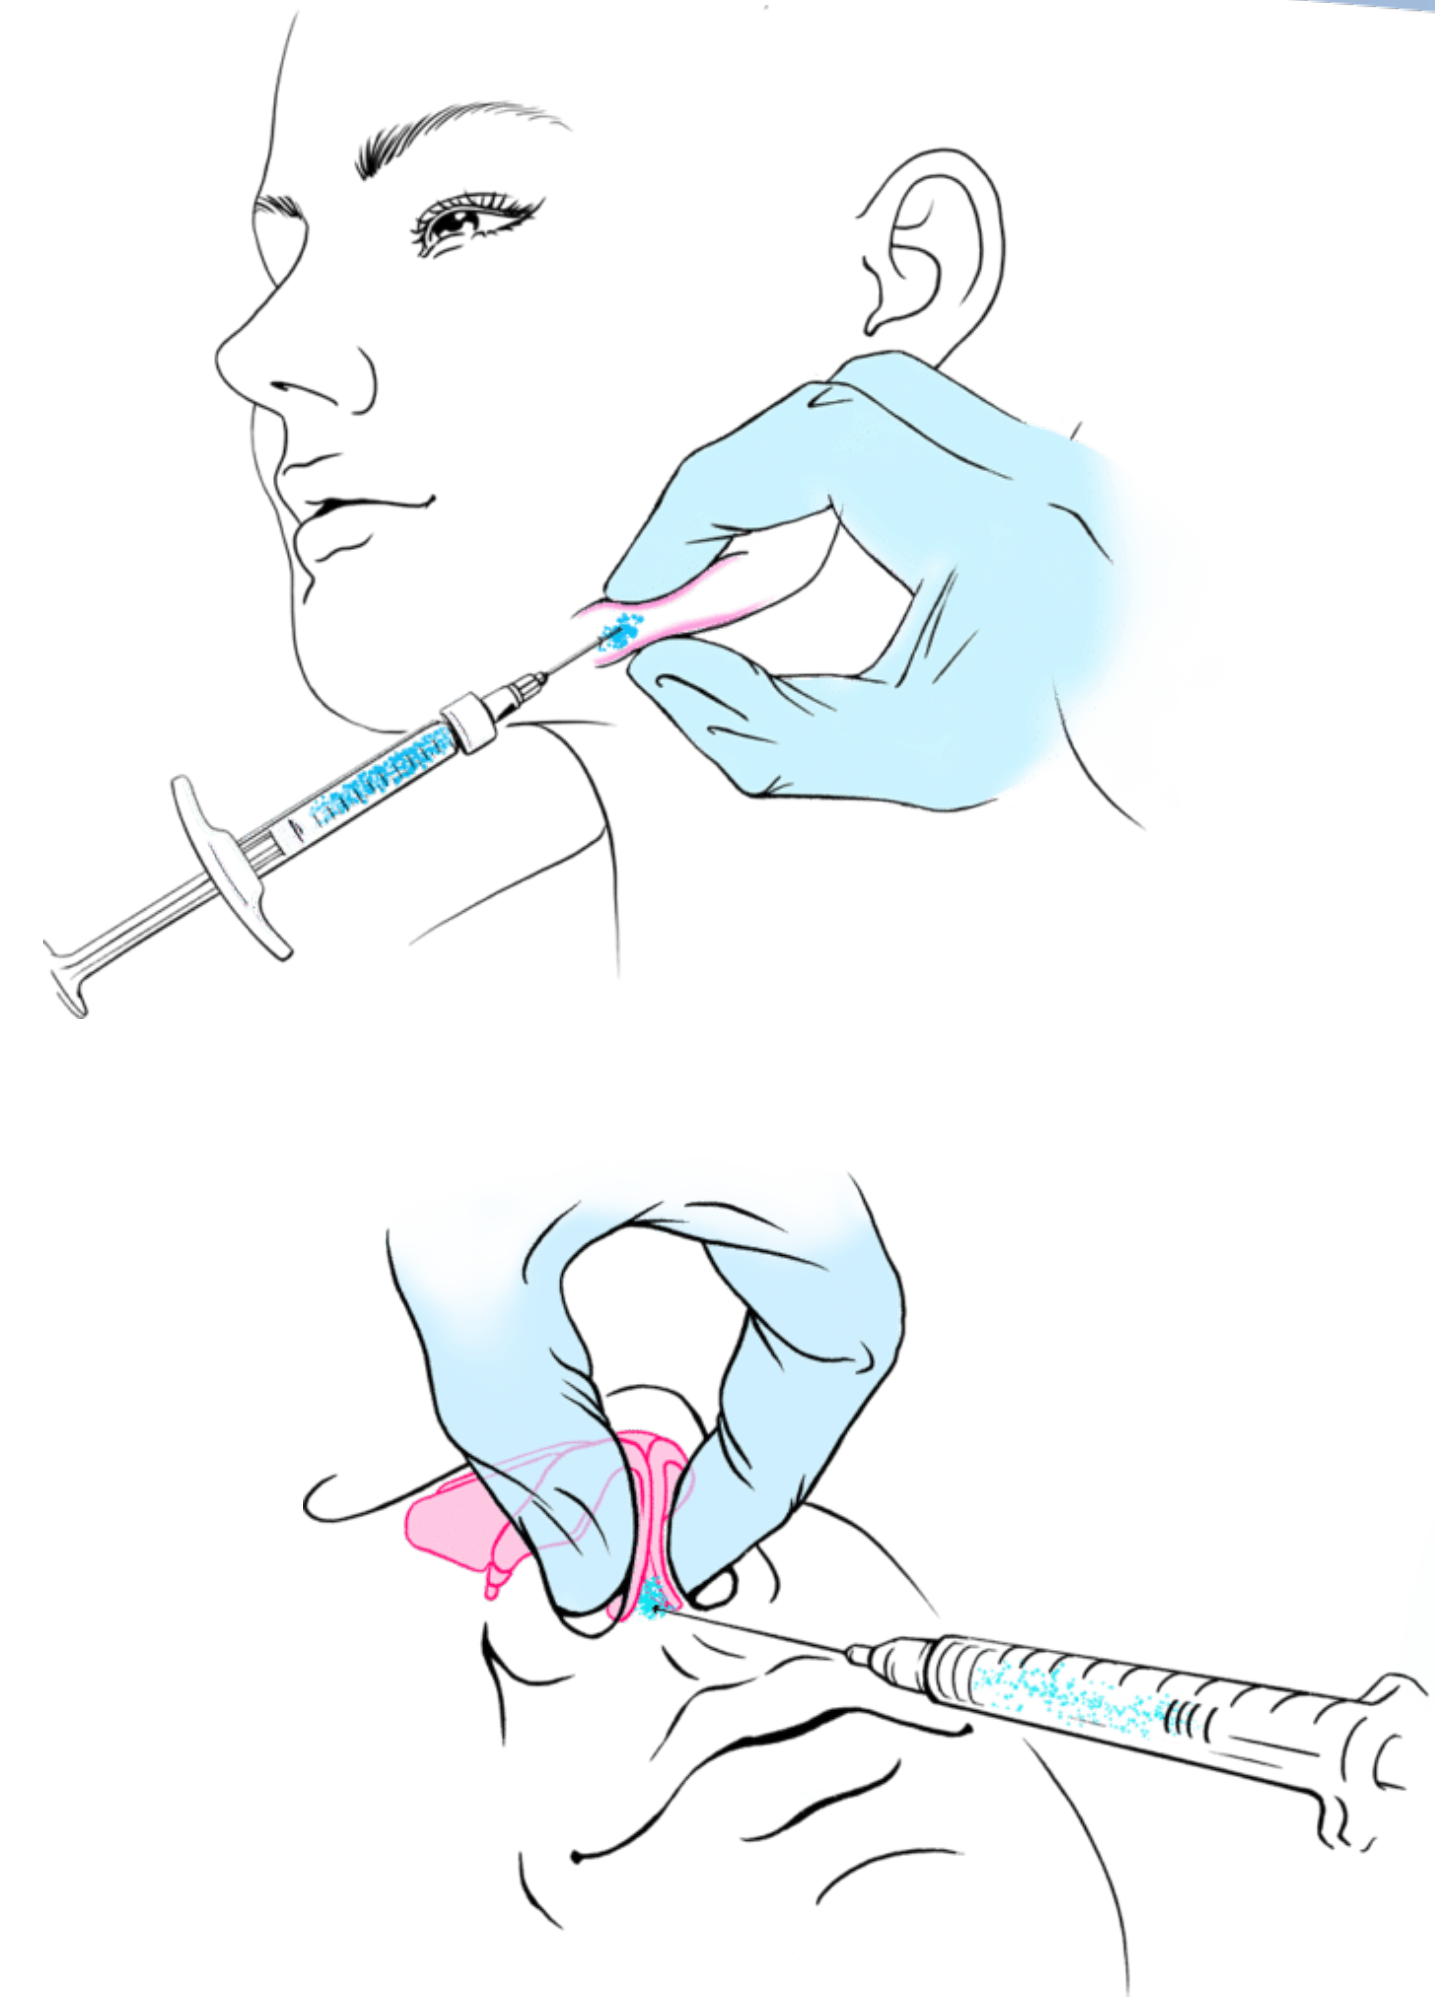

High visco-elasticity is one of REVOLAX's stand-out properties. This malleable consistency creates immediate and long-lasting volume and also allows the product to break down evenly with a natural finish.

## HIGH PURITY HYALURONIC ACID

REVOLAX has a low percentage of product migration, meaning that once injected the product is more likely to stay close to the injection site with accuracy

## STRINGENT QUALITY CHECKS

Stringent quality checks remove all traces of the crosslinking agent BDDE from the finished product, through a rigorous

## WHAT IS HYALURONIC ACID?

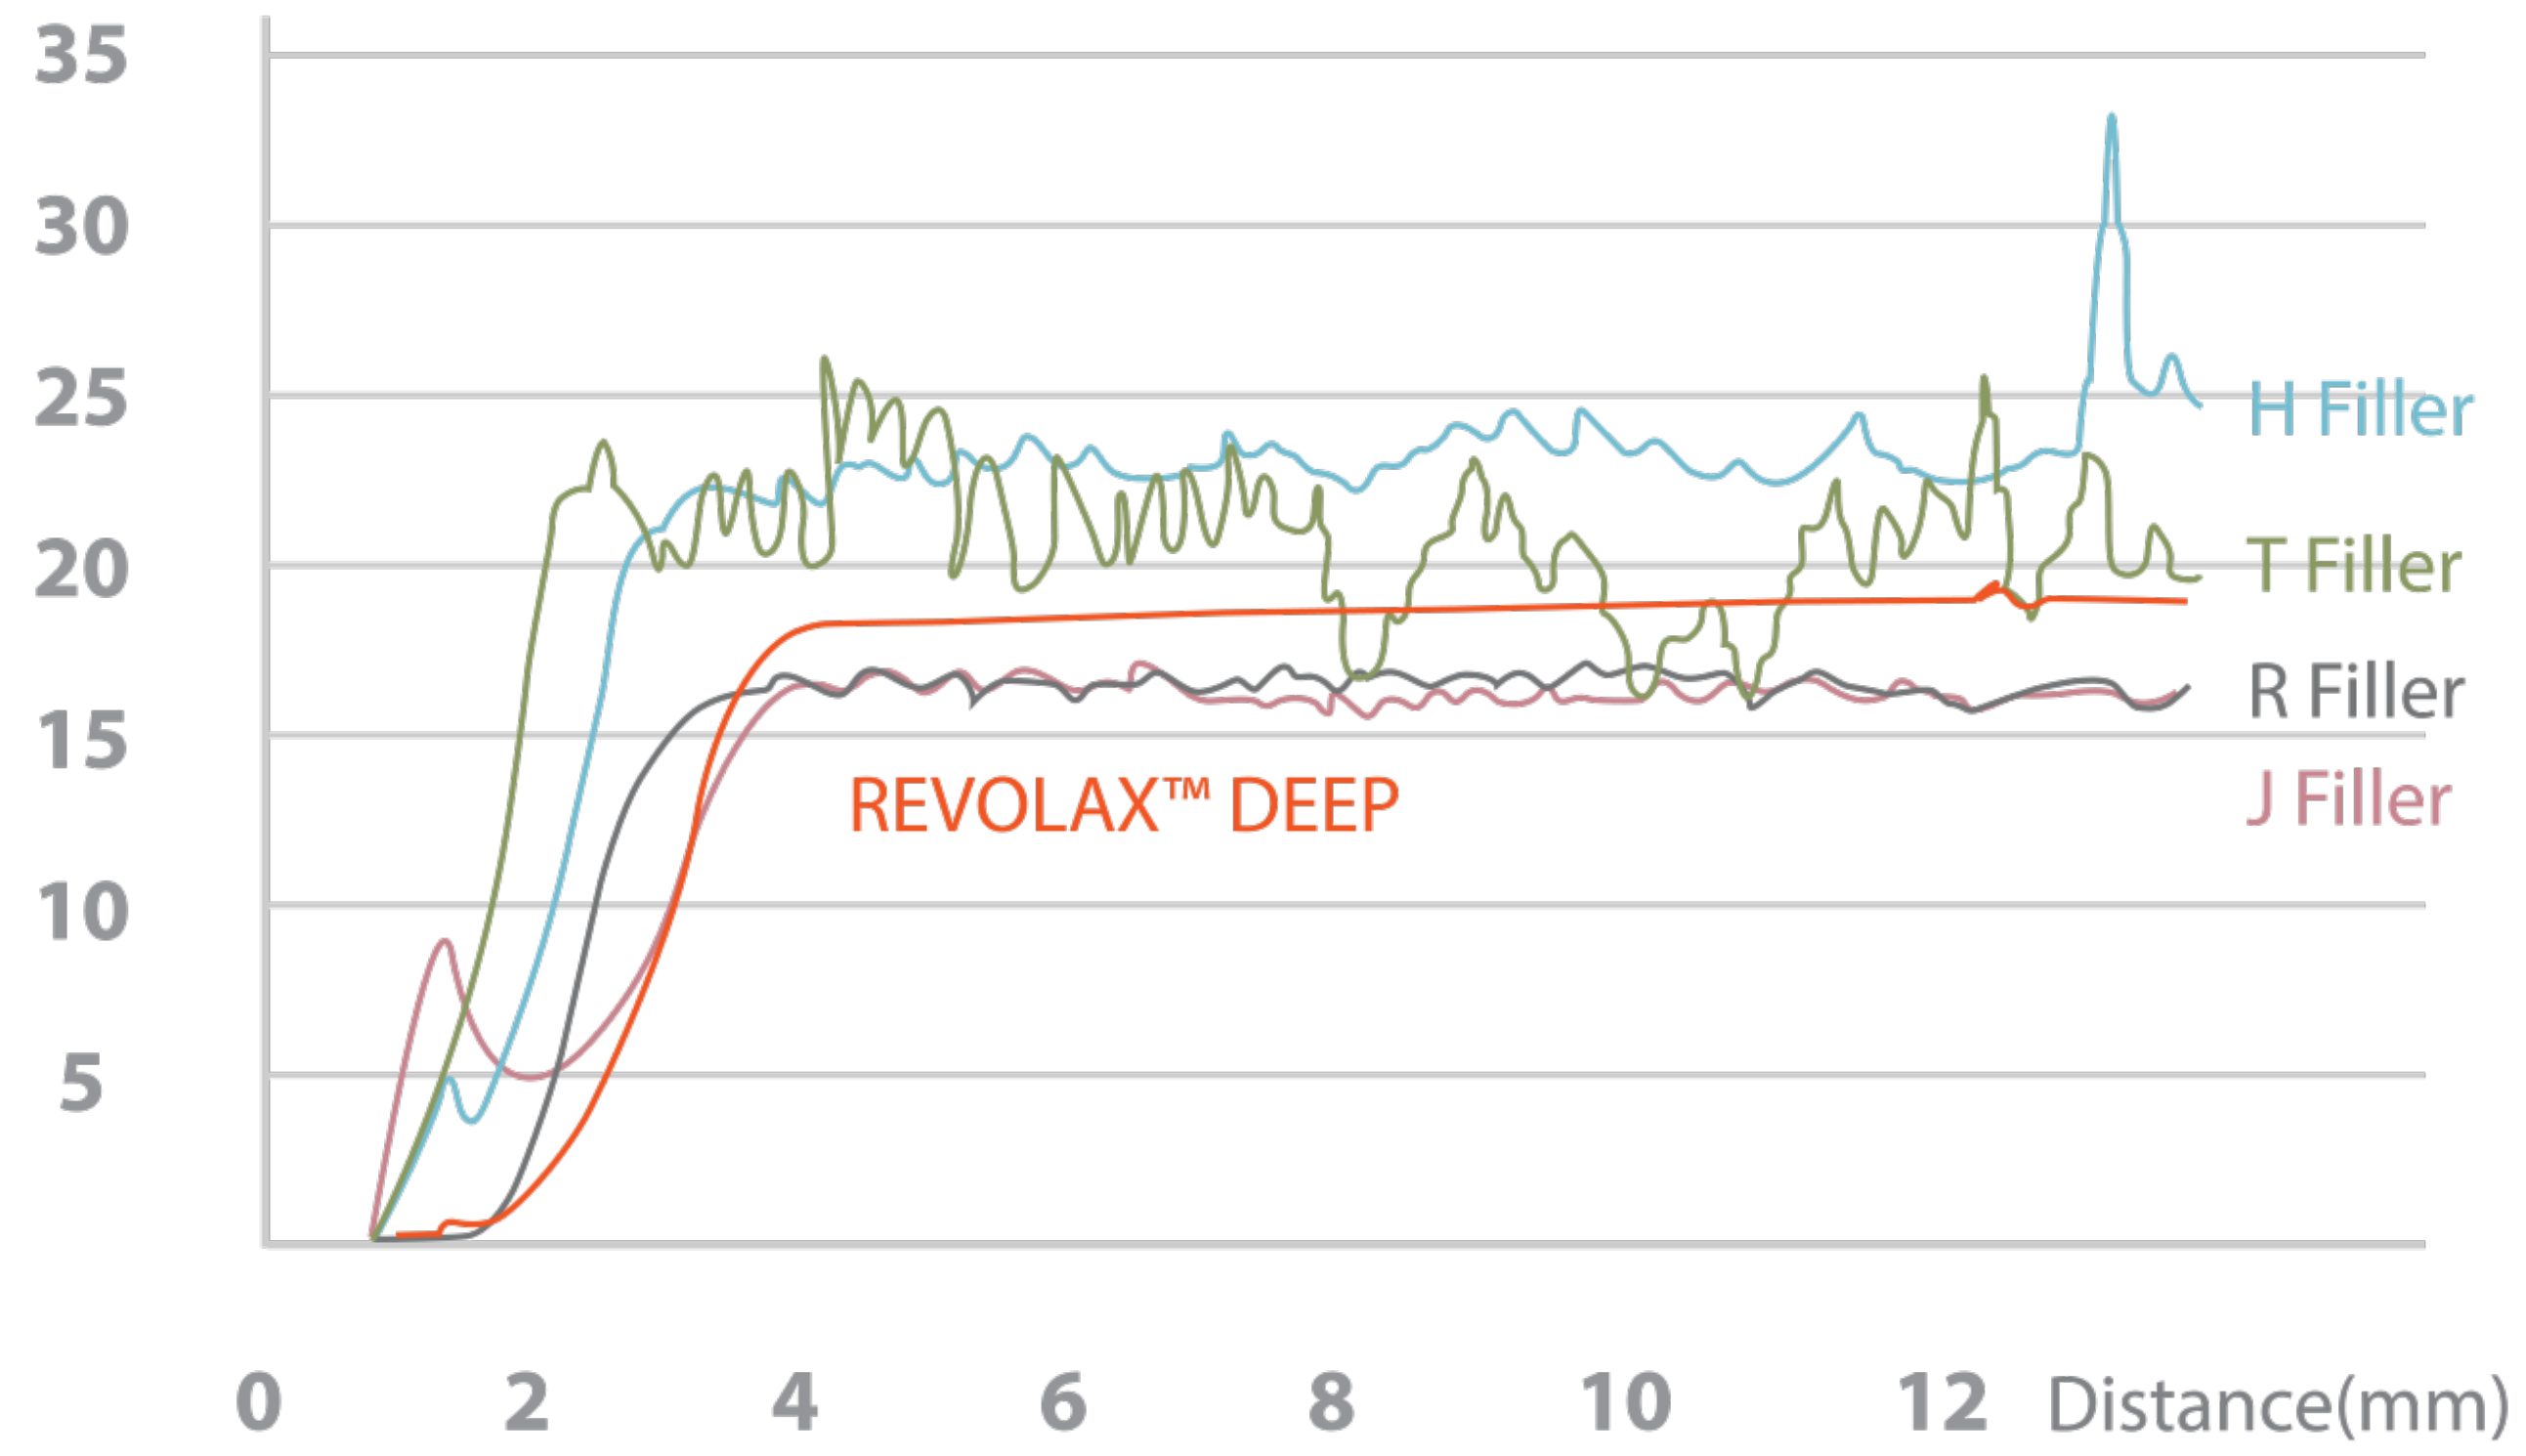

Hyaluronic Acid is a naturally occurring substance that can be found in the body's cells. With impressive moisturising properties, HA is highly soluble and can hold up to 1000 times its own weight in water.

As HA molecules have immunological tolerance, the ability to assist in the regeneration of collagen and excellent absorption properties, the HA molecule is perfect to volumise and moisturise skin.

Within the body, HA has a rapid turnover and degrades with a half-life of 24 hours in vivo. To be considered as a cosmetic treatment, HA must be chemically modified to prevent decomposition. This process transforms HA from a liquid into a gel by crosslinking Hyaluronic Acid polymer chains to one another and allows the molecules to fill wrinkles and maintain shape for more longevity.

As REVOLAX is highly crosslinked, the skin takes longer to break down the HA meaning REVOLAX dermal fillers are more long-lasting than its rival competitors.

# Extrusion Force Test Graph

| Product             | N    |
|---------------------|------|
| REVOLAX™ DEEP       | 18.5 |
| R Filler            | 16.3 |
| J Filler Ultra+     | 16.0 |
| H Filler            | 23.1 |
| T Filler Deep Lines | 22.2 |

## Soft injection

- By using Ultra Thin Wall needle, soft injection is available and helpful to minimize pop off.
- Due to uniform monophasic structure, REVOLAX™ can be properly injected without free HA.

## RECOMMENDED INJECTION AREA

### **REVOLAX™ Deep with Lidocaine**

*Mid to deep dermis / Subcutaneous layer*

*Nasolabial folds, Laugh lines, forehead, Nose, chick, chin augmentation.*

### **REVOLAX™ Fine with Lidocaine**

*Superficial to top dermis*

*Forehead lines, Crow's feet, Glabella lines, Neck wrinkle, Lower eyelid contouring*

### **REVOLAX™ Sub-Q with Lidocaine**

*Deep subcutaneous Layer*

*Nasolabial folds, Laugh lines, forehead, Nose, chick, chin augmentation*

## TREATMENT AREAS

### **FOREHEAD LINES**

To treat superficial forehead lines, **REVOLAX Fine** integrates itself into the body's own tissue to create a natural, rejuvenated look.

REVOLAX  
**FINE**  
with Lidocaine

### **GLABELLA LINES**

Glabella lines, also known as frown lines, can be corrected with the help of **REVOLAX Fine**.

### **TEAR TROUGHS**

The thin gel of **REVOLAX Fine** is the perfect choice to treat the tear trough area and create a well-rested appearance.

REVOLAX  
**DEEP**  
with Lidocaine

### **CROWS FEET**

**REVOLAX Fine**'s lightweight consistency is perfect to treat smaller, superficial lines around the eyes like crow's feet.

### **NOSE AUGMENTATION**

Nose Augmentation, also known as non-surgical rhinoplasty, can be achieved by changing the tip and bridge of the nose whilst also working to smooth a dorsal hump.

This can all be achieved with **REVOLAX Deep** or **REVOLAX Sub-Q**.

REVOLAX  
**SUB-Q**  
with Lidocaine

## TREATMENT AREAS

### LIP CONTOURING

**REVOLAX Deep** can be used to add volume, plumpness and hydration to the lips. This includes adding shape to the cupid's bow.

REVOLAX  
**FINE**  
with Lidocaine

### CHIN AUGMENTATION

**REVOLAX Sub-Q** works to enhance contours, shape and balance of the face by strengthening the jawline and creating a shapelier result.

### MARIONETTE LINES

Marionette lines are the two distinctive lines running from the corners of the mouth to either side of the chin. They can be easily filled with **REVOLAX Fine**.

REVOLAX  
**DEEP**  
with Lidocaine

### MID-CHEEK

Furrows within the Mid Cheek area can be rectified using **REVOLAX Deep** which works to plump hollow effects.

### JAWLINE

Jawline Augmentation can be achieved with **REVOLAX Sub-Q** to create definition and shape.

REVOLAX  
**SUB-Q**  
with Lidocaine

# BEFORE & AFTERS

At REVOLAX, we want to see results that make us say 'wow!'. As the age-old saying goes, "a picture speaks a thousand words" and these before and after images left us speechless!

# Product Advantage

Hyaluronic Acid Dermal Filler

## **REVOLAX DERMAL FILLERS ARE NOT SUITABLE FOR:**

- Women who are pregnant or breastfeeding
- Patients who are known to demonstrate hypersensitivity to Hyaluronic Acid
- Patients who are known to demonstrate hypersensitivity to Hyaluronic Acid
- Patients who tend to develop hypertrophic scarring
- Immediately before or post laser therapy, chemical peeling or dermabrasion
- Areas presenting cutaneous inflammation or signs of infection
