PRODUCTS

VENOME AMBER SAFFRON+

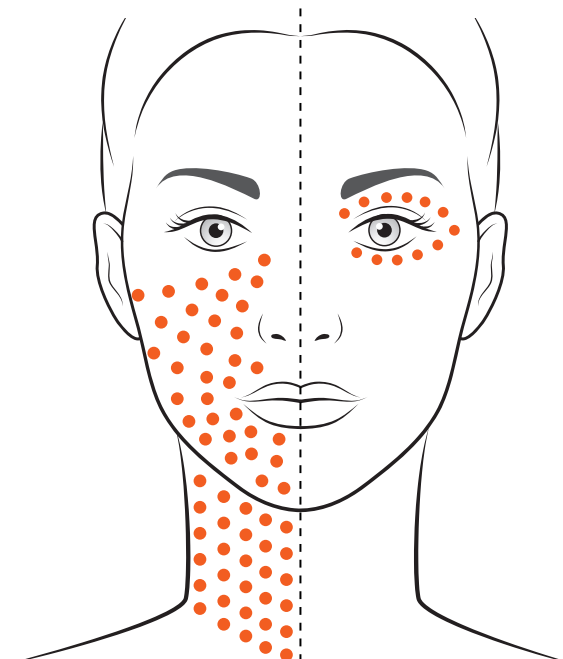

VENOME AMBER HYDRO 0,55%

An innovative combination of **Amber Saffron+** and **Amber Hydro** helps effectively stimulate the production of protein fibers and revitalize the skin on your face and in the periorbital area to make it brighter, reduce hyperpigmentation, and minimize dark spots. **Succinic acid and fragmented hyaluronic acid** contained in **Amber Saffron+** strongly hydrate tissues, restoring the right water balance, and additionally stimulating the activity of fibroblasts. Thanks to an innovative combination of tyrosinase inhibitors dark spots can be minimized in no time.

The synergistic action of the ingredients in the two products helps reduce the problem of wrinkles and loose skin, giving your skin a healthy **GLOW**.
